

Hydrophobing

made easy

Constant contact with moisture and steam can cause the furniture panels to swell.

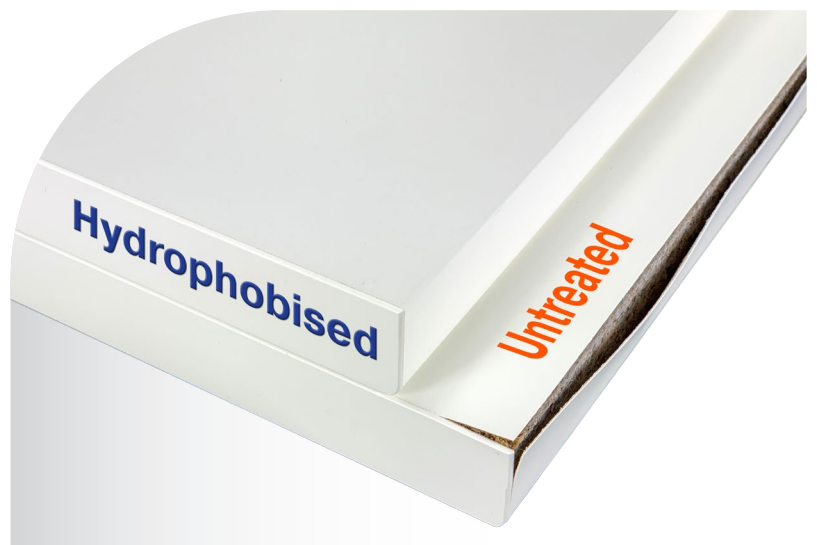

The **Hydro Pen** seals already finished workpiece edges against moisture penetration and extends the water resistance by many times over. Ideal for quick use in all areas - even on the road.

The application is uncomplicated: Open the pen, draw the special felt over the area to be sealed and let it dry for a short time.

- ✓ **Easy handling**
- ✓ **High yield (ca. 350 rm)**
- ✓ **Fast drying**
- ✓ **Nearly invisible**
- ✓ **Fast and flexible to use everywhere**

This is how we tested:

Workpiece:	CPL coated chipboard. Two-sided edged
Test setup:	2 cm deep water bath
Test duration:	6 hours
Result:	The hydrophobised workpiece shows no swelling
